<b>Reason for Suggestion</b> 	<p>ALA's <i>Booklist</i> says, "The artwork is cheerful and bright with high-contrast colors, depicting wonderfully unusual animals...Perhaps the truest charm of this book lies in its language, rich with assonance, alliteration, and internal and end rhymes and liltily cadenced with read-aloud rhythm."</p> <ul style="list-style-type: none"> <li>• <b>INTERACTIVE:</b> Silly, rhyming text invites readers to assess, re-assess and make predictions.</li> <li>• <b>ENGAGING FORMAT:</b> The book's large format and gatefold at the end fully immerse children in the reading experience.</li> <li>• <b>VISUALLY DRIVEN:</b> The wacky and loveable illustrations drive the story line while providing humor and interest.</li> <li>• <b>STEM:</b> The book introduces a variety of unusual animals and encourages children to count and make estimates.</li> </ul>
